

**RELEVANT INFORMATION**

**COMPANY ANNOUNCEMENTS**

Bogotá, June 12 de 2015.

Banco de Bogotá informs that on June 12 2015 the following financial statements as of March 31, 2015, separated and consolidated, were transmitted following the technical regulatory framework based on International Financial Reporting Standards – IFRS: Comprehensive Income Statement, components of other comprehensive income net of tax effects.

Additionally, the Bank informs that it modified the consolidated Comprehensive Income Statement for the period, classified by nature of expense, as of March 31, 2015, given that the report already published only included the result attributable to controlling shareholders; the modified statement includes both, the result attributable to controlling shareholders and attributable to non-controlling shareholders.

In the following days the Bank will transmit the remaining financial statements: Cash Flow Statement, indirect method and Statement of Changes in Equity.

Taking into account the regulatory requirements for the implementation of new specifications, the Bank states that we will move forward in an expedite manner towards completing IFRS information.
